NEWLY BUILT TERRACED HOUSE WITH GARDEN AND BALCONY

Consisting of seven villas featuring modern and functional spaces, the project harmoniously integrates architecture and nature. The structure is distinguished by large windows that allow natural light to embrace the interiors, creating an intimate and welcoming atmosphere.
A residential experience that uniquely combines style and comfort, while also focusing on energy efficiency and environmental sustainability.
Beauty meets functionality, each layout features generous spaces, everything is designed to ensure maximum functionality and comfort.
The interiors blend harmoniously with the private garden and balconies, creating continuity between internal and external spaces.
The garden becomes a haven of tranquility where nature becomes part of the architecture, offering owners a place to regenerate and enjoy beauty in every season.

Characteristics:
At the heart of the system is an innovative radiant floor system that distributes heat evenly, providing an optimal heating and cooling experience.
The heat pump for the air conditioning system guarantees superior energy efficiency, reducing the environmental impact.
Furthermore, with the 6kW photovoltaic system and a storage battery, your home becomes practically self-sufficient, generating clean energy for your daily needs.

Finally, the PVC window frames ensure excellent thermal and acoustic insulation, helping to maintain an ideal temperature without waste.
The villas are equipped with a smart BTicino video intercom that, thanks to the simple and intuitive app, allows you to have total control of the home, wherever you are.
You can also manage your thermostats via the app to maximize your home's comfort and optimize energy consumption with just one click.
The villas offer the option of easily integrating your chosen alarm and video surveillance system, ensuring maximum security and customization.
Home automation completes the experience, offering total control.
